

osmo®

Finish and renovate cladding

Practice. Knowledge.

Project for project highest quality.

Every project presents different challenges. With Osmo on your side, you are optimally prepared. Our renowned products are versatile in use and enable you to fulfil exactly what your customers desire. Regardless whether opaque or transparent coatings, whether cladding, carports or garden sheds – with Osmo, you will reach your goals faster, more efficiently and successfully.

Coatings as individual as your customers.

You can either mix the colours of Osmo coatings from the same product family with each other to create the desired colour shade. Or you can offer your customers coatings matched to a specific RAL colour tone, suitable for their windows and doors.

Variety of applications in professional quality

Our oil-based coatings are formulated exactly for the needs of professional users and are suitable for a wide spectrum of various applications and projects. Only one thing always stays the same: the high quality of the results.

Reliably good work

Besides their large colour range, our coating systems also impress with simple application without priming, high hiding power and product coverage as well as short drying times. Thus, you get more done with less effort – and save time and money at the same time.

Long-last effective wood protection

The quality of your work is also measured on how long the wood and coating withstand the weather conditions. With our coating systems, you provide a breathable, microporous and elastic surface that gives wood lasting protection.

All-round satisfied customers

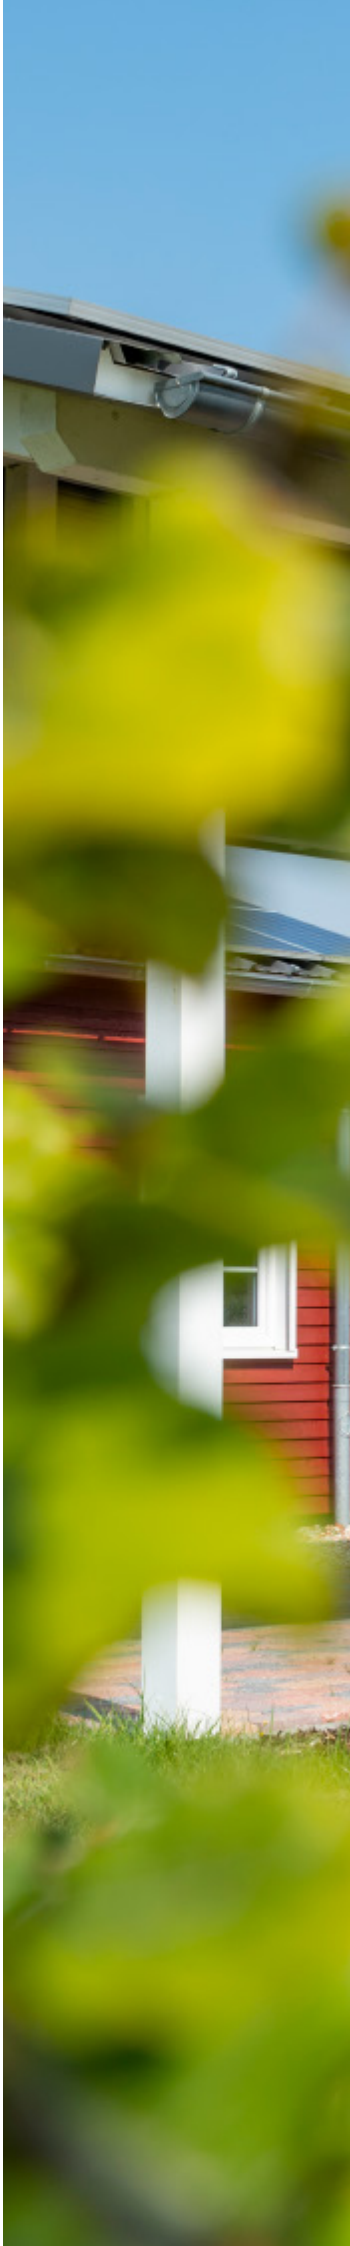

With the Osmo brand quality, you offer your customers something special. Our products are based on natural healthy raw materials – a good feeling for your customers. So you can carry out contracts more quickly and efficiently – good business for you.

Sustainably convincing reasons.

Healthy indoor climate and sustainability are topics that play an even larger role in the planning and implementation of your projects. When your customers ask you about this, you can cite convincing reasons. Our oil-and-wax-based products are made from natural and safe raw materials. They are even suitable for treating children‘s toys. This will surely give your customers a good feel – also for future orders.

- DIBt technical approval
- Oil-based coatings
- Sustainable raw materials
- High solids content between 50 and 100 %
- Suitable for children‘s toys
- Food safe
- High coverage

Naturally on the safe side.

Osmo coating systems like our Country Colour or Garden Colour are suitable for every intended purpose. They are free of harmful substances and additives so they can be used in especially sensitive areas, for example playgrounds, without any reservations.

Twice as much coverage.

Our coating systems have a high content of colour pigments and provide approximately twice as much coverage as most other coatings. Due to the high hiding power, no priming is necessary. For renovations, time-consuming sanding work can be skipped. This really pays off – for you and your customers.

The colours of your success.

Osmo is considered a pioneer in modern coating systems. We offer you a large range of waterborne and oil-based coatings in opaque and transparent colours, which leave no customer wish unfulfilled. Especially when it comes to colour selection, you will make a hit with our precision.
You can offer your customers not only Osmo coatings in the standard colours, but also every desired colour shade that can be mixed within one product family. If the customer would like to have a particular RAL or NCS colour – this is also no problem.

Simply cover all wishes.

Our opaque finishes impress even before you have coated your customer‘s timber cladding in the colour of their choice. After all, they possess the ideal properties for exterior use. They are easy to process, do not need priming, stay workable and storable even at hot and cold temperatures and give wood a long-lasting, protective and attractive surface. Little effort, big effect – easily done with Osmo.

19 colours

Country Colour

Variety of possibilities for the exterior

> Suitable for play equipment, nursery schools and playgrounds
> Robust to small damages
> Ideal for renewing all exterior wood
> Available in a variety of colours according to RAL and NCS charts
> 1 litre covers approx. 26 m^2 with one coat

15 colours

Garden Colour

Opaque finish without any priming

> Waterborne
> Extremely short drying time
> Low susceptibility to dirt
> 1 litre covers approx. 16 m² with one coat
> Sprayable
> Recoatable after 3-4 hours

Limitless colour variety.

Osmo makes it easy for you to work with colours. Within a single product family, the existing colours can be mixed with each other as pleased. Microporous, oil-based Country Colour can be ordered in almost all colours in the RAL or NSC colour spectrums – by the way, the same applies for Garden Colour.

Offer an alternative with transparent coatings.

Do your customers like the natural look of wood? With our transparent coatings, you can offer an attractive alternative to opaque finishes and highlight the nature beauty of wood individually.

Naturally a joy for customers.

The nature texture of real wood is a uniquely fascinating sight. With our transparent coatings, you emphasise the typical, unspoiled wood character. Osmo offers you a wide selection of products that are simple in application and keep the wood visible – as well as your customers satisfied, too.

Keep what is important in sight

The transparent coatings from Osmo allow you to find the perfect balance between optimal protection and preserving the natural beauty of wood. Here you can also benefit from the helpful properties of our products in your work. Thanks to their high solids content, the coatings offer high coverage and are easy to apply. For their production, we use renewable plant raw materials like sunflower, soybean and thistle oil.

19 colours

Natural Oil Woodstain

Primer and stain in one coating

> Recoatable after approx. 4-6 hours
> Protects wood against mould, algae and fungal attack
> 1 litre covers approx. 26 m^2 with one coat
> Extremely weatherproof and UV-stable

Even greying with Osmo stains.

When wood turns grey naturally, often a blotchy uneven appearance is the result. You can normally counteract this effect by cleaning it painstaking so the greyed wood surface is revived. Osmo offers you a more elegant solution: Simply treat the wood surfaces with the grey of your choice: with our matt Greying Stain, the satin Natural Oil Woodstain or the sliver-shimmering Natural Oil Woodstain Effect. As a result, the wood shines in an attractive, modern and elegant grey from the very first day – and your customers do not have to wait for the natural greying effect.

3 colours

Natural Oil Woodstain Effect

Shimmering protection for all wood

> Counteracts the natural greying
> Protects wood against mould, algae and fungal attack
> Recoatable after approx. 4-6 hours
> 1 litre covers approx. 26 m² with one coat

8 colours

Greying Stain

Base coat and stain in one

> For an even grey look from the very start
> Matt surface
> Long-lasting protection for the exterior
> Protects the coating against mould, algae and fungal attack
> 1 litre covers approx. 26 m² with one coat

14 colours

One Coat Only HS Plus

Complete protection after only one coat

> Free of biocides
> High coverage thanks to high solids content
> 1 litre covers approx. 26 m² with one coat

8 colours

Transparent look. The advantages of a wood stain.

A stain is a coating under which the wood grain can still be clearly recognised. Wood stains can be oil-based or waterborne – depending the colour tone, they produce either a clear or transparent colour surface protection. Clear means, that although the coating does not contain any pigments, the wood is still sufficiently protected. A satin coat creates a slight sheen on the surface – a matt coat, on the other hand, makes the surface look very natural.

Garden Stain

Extremely weather-resistant and UV-stable wood coating

> Dries extremely fast
> Microporous and water-repellent
> 1 litre covers approx. 16 m² with one coat
> Reliably good work

Additional treatment for wood facing weather and wear

With carefully planned cladding construction and a coating system formulated for it, usually the chemical wood protection can be foregone. However, for extreme wear or stress, for example through water or weather conditions, or for wood species susceptible to blue stain, you should go without.

More protection for more reliability.

Exterior wood must be have lasting protection against influences like humidity, UV radiation or pests. In some cases, a deeply effective chemical wood protection is necessary, for example impregnations against rot, blue stain and wood-destroying insects. Osmo also offers in this area high performance products. That way the wood stays in shape – both visually as well as structurally.

Everything for an allround resilient end result

Timber cladding has a lot to face – and that throughout the year. Rain, sunshine, wind and snow affect the surface, all kinds of pests can attack the wood. Special situation, for example salty sea air at the coast, put more stress on the material. With our products, you can provide high-wear wood surfaces optimal and effective protection from the very beginning – and retain its natural beauty and resistant for a long time.

10 colours

UV-Protection-Oil and UV-Protection-Oil Extra

Effective sun protection for wood

> For all horizontal exterior wood surfaces
> With or without film protection
> Recoatable after approx. 12 hours
> 1 litre covers approx. 18 m^2 with one coat

WR Base Coat

Clear protection for the exterior

> Reduces swelling and shrinkage of wood
> Protects wood against blue stain, rot and wood-destroying insects
> Strongly water-repellent
> Top coat required

Clear Oil Wood Finish

Primer and coating in one product

> Versatile in use
> Recoatable after approx. 10-12 hours
> 1 litre covers approx. 16 m² with one coat

Primer

Ideal as a first coat before installation

> Blocks and hides knots
> Protects wood against mould, algae and fungal attack
> Very fast drying
> Non-drip and non-splatter formula
