

A man with short brown hair, wearing a black t-shirt, is focused on using a green Osmo hand-applied finisher on a wooden workbench. The finisher has a green handle and a black base with a white felt pad. In the background, there is a window with a view of greenery, a white bottle, a brown container, and a teal power tool on a grey cabinet.

osmo®

Finish & renovate furniture & stairs

Practice. Knowledge.

With Osmo at an advantage – in every situation.

You know the situation: for projects in the interior, customers often have an exact idea of what the results should look like. Especially when comes to the look of furniture and stairs made of wood. With Osmo, you are well-prepared for any customer wish: we are considered a pioneer in modern coating systems based on natural oils and waxes. In all residential and commercial areas, Osmo products can be used. They protect and maintain wood in every shape and form perfectly and provide a long-lasting attractive surface. Utilise our experience for your business: with Osmo, you achieve your goals – and those of your customers – in every situation.

Certainly safe

Osmo coating systems are absolutely safe for use in indoor areas when dry and do not emit any harmful substances. This is particularly important for surfaces in the kitchen that have direct contact to food. In children's bedrooms and in the use on children's toys, our products provide non-hazardous, water-resistant and saliva-resistant surfaces. This high and reliable quality gives you security and convinces customers.

Short drying times

Osmo products that make work easier for you. For example through shortened drying times between the first and second coats. An advantage that gives you a significant head start on your work.

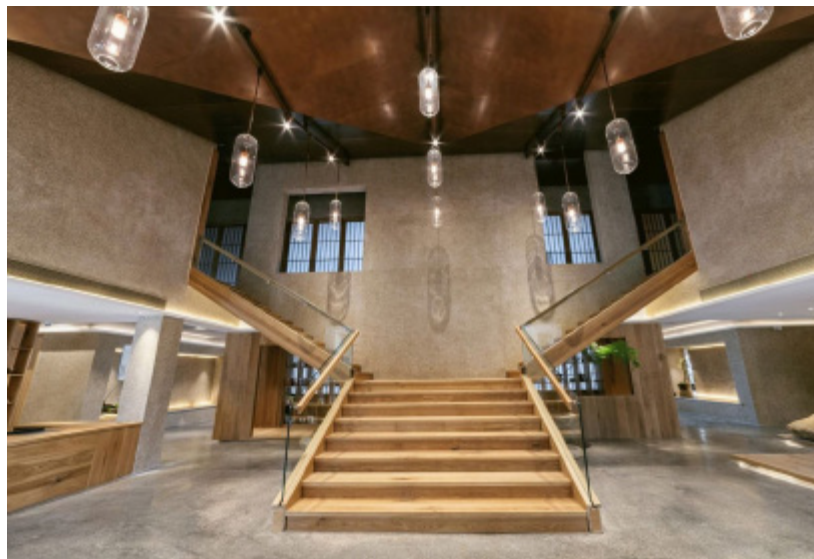

3

A visual eye-catcher

Whatever your customers desire, with Osmo you will be able to carry it out. No matter whether transparent colours, opaque colours, your own mixed colour or a specific RAL colour: the variety of colours available with our coatings gives you the possibility to fulfil precisely the design requirements of your customers. This provides you with lastingly satisfied customers who enlist your service and recommend you to others.

Lastingly reliable quality

Especially high-wear wood surfaces in companies, airports or public spaces need durable and robust surfaces. Our coatings protect wood reliably and effectively: they deeply penetrate wood and produce a breathable, microporous and elastic surface. Providing reliable protection and thus also satisfied customers.

Sustainably convincing reasons.

Healthy indoor climate and sustainability are topics that play an even larger roll in the planning and implementation of your projects. When your customers ask you about this, you can cite convincing reasons. Our oil-and-wax-based products are made from natural and safe raw materials. They are even suitable for treating children's toys. This will surely give your customers a good feel – also for future orders.

4

DIBt technical approval

Oil-based coatings

Sustainable raw materials

High solids content between 50 and 100 %

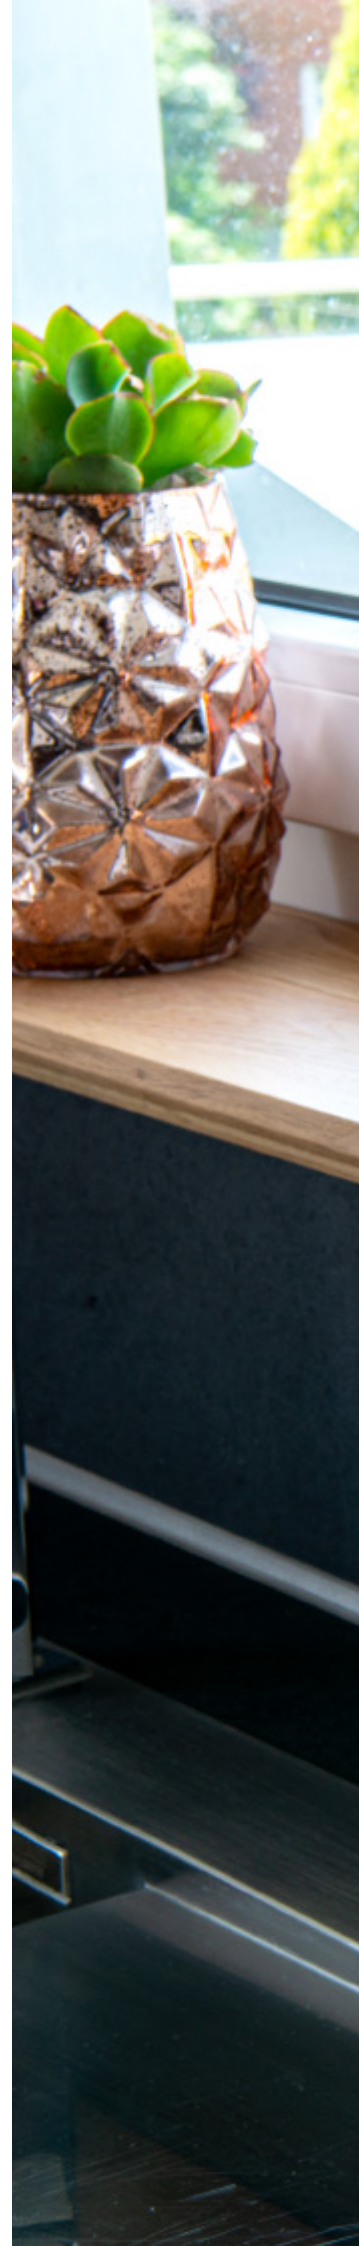

Suitable for children's toys

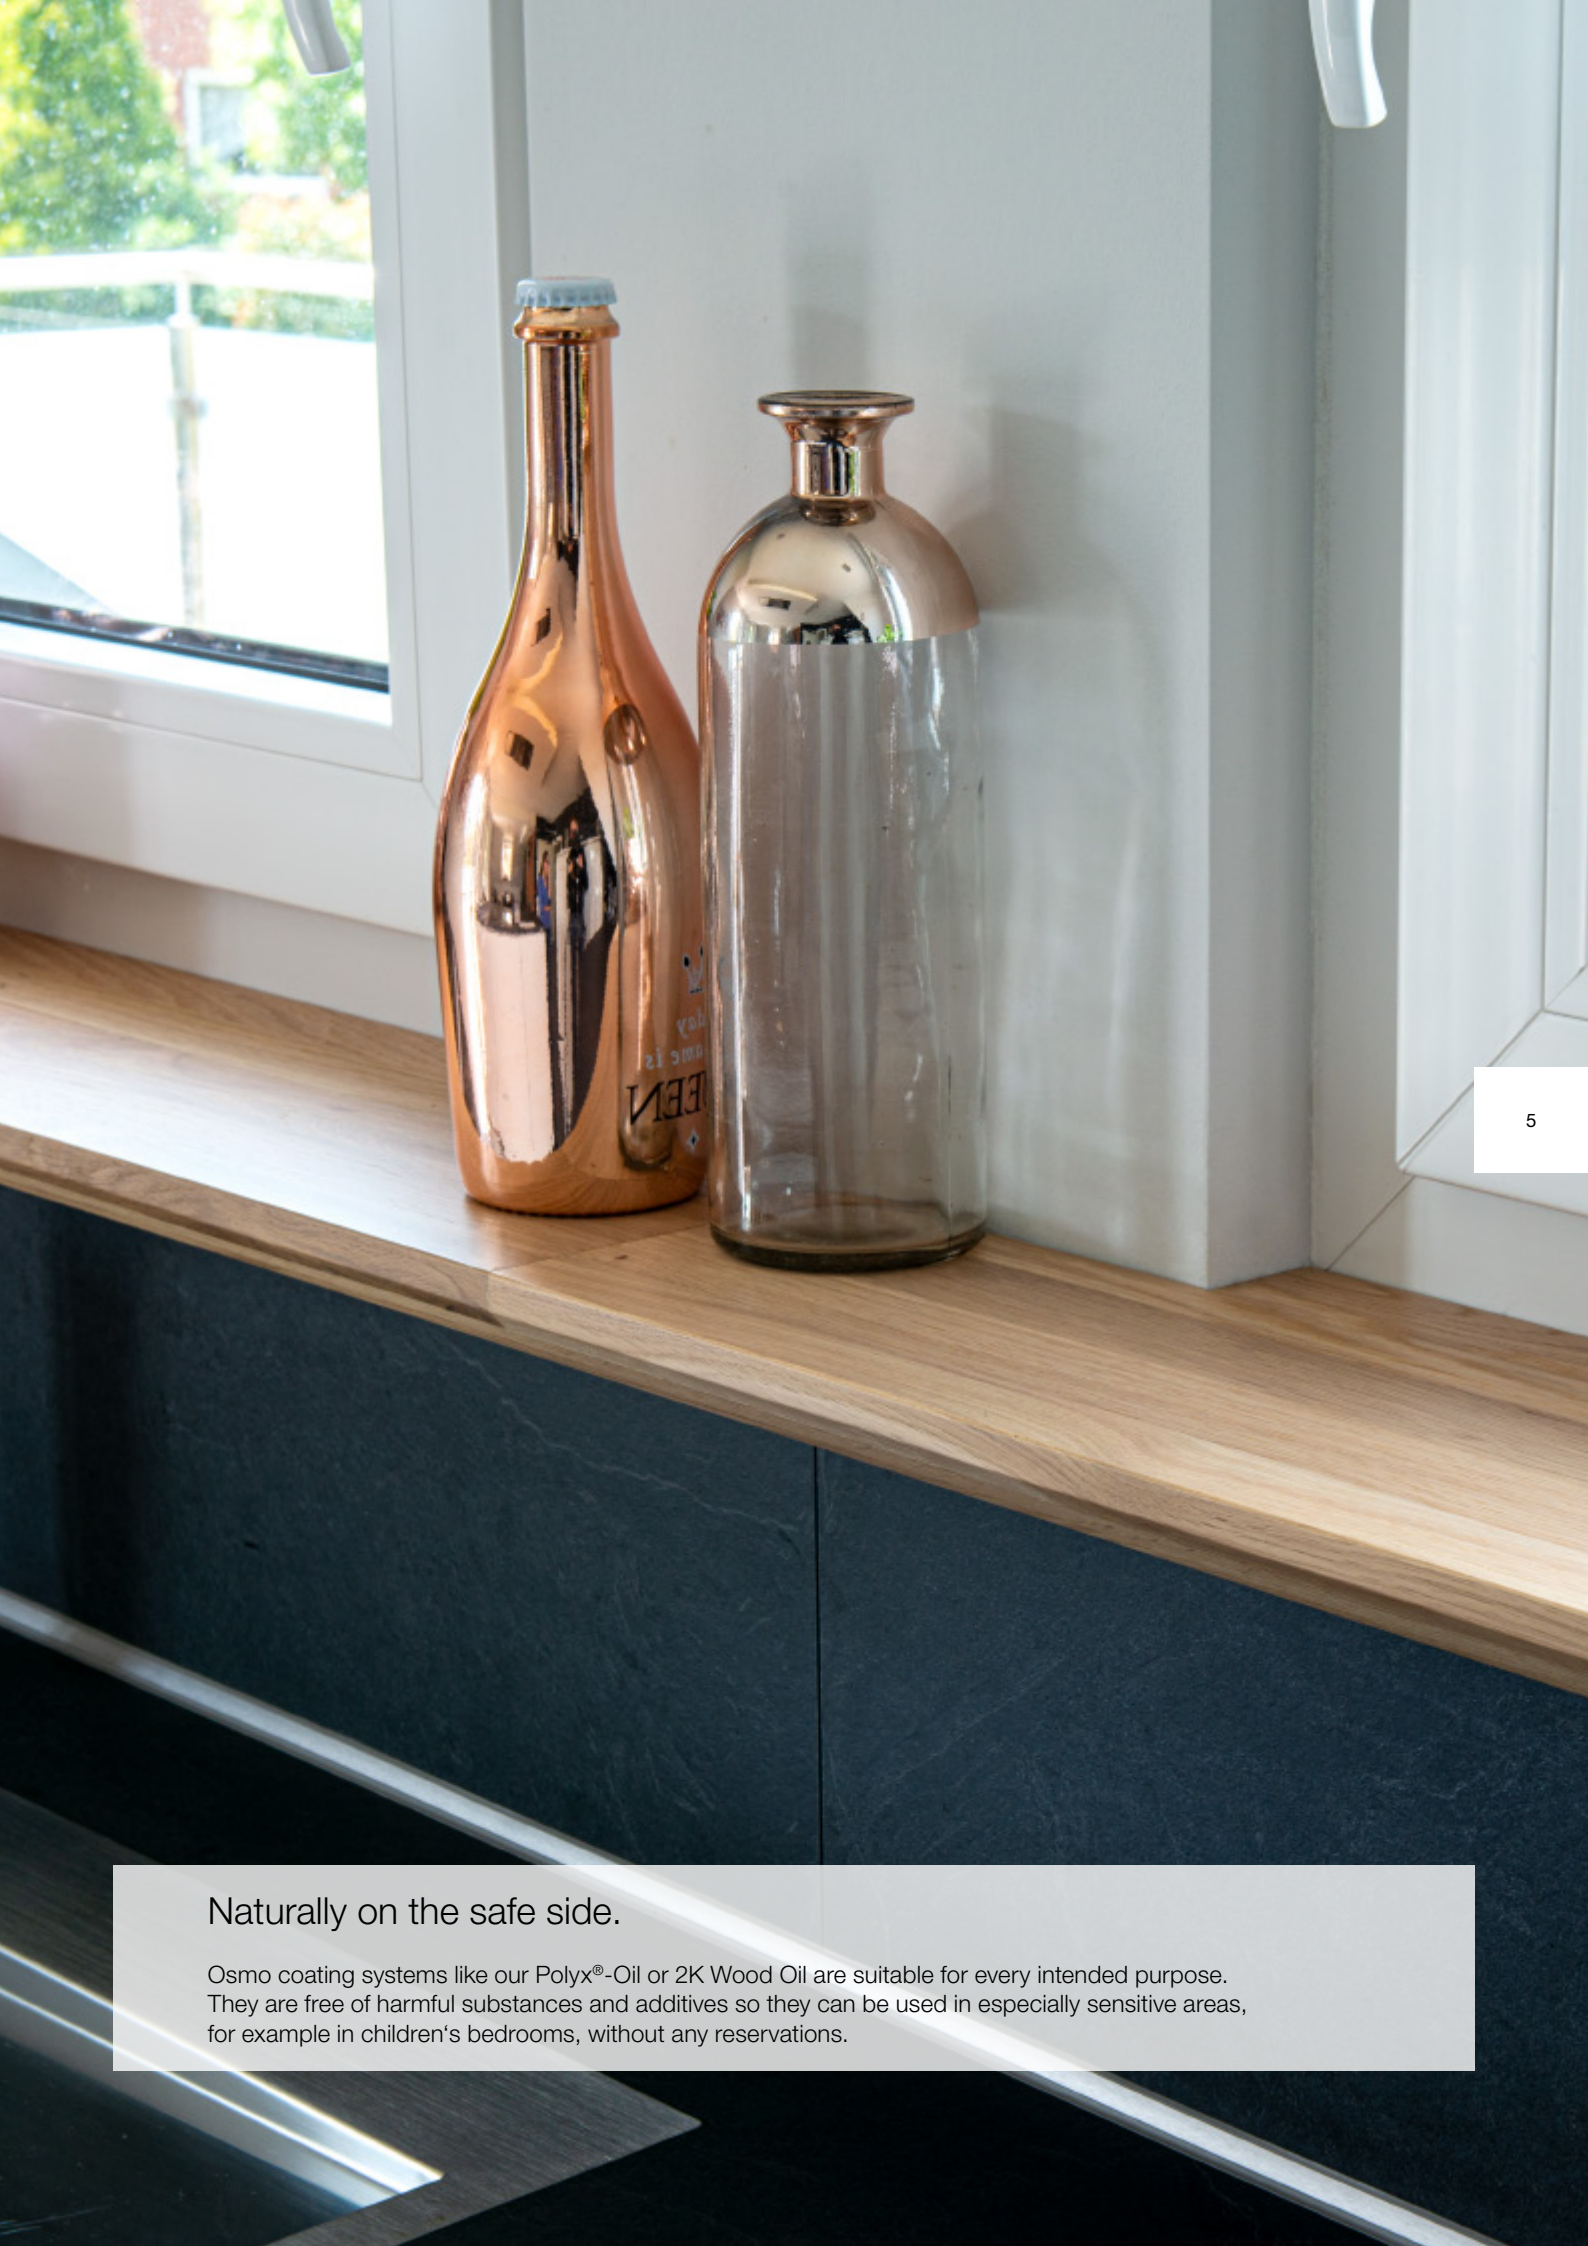

Food safe

High coverage

Naturally on the safe side.

Osmo coating systems like our Polyx[®]-Oil or 2K Wood Oil are suitable for every intended purpose. They are free of harmful substances and additives so they can be used in especially sensitive areas, for example in children's bedrooms, without any reservations.

Individual wood designs

Owning wooden furniture or stairs already shows a preference for sustainability and uniqueness. Coloured coatings from Osmo offer the possibility to add individual accents.

To provide the pigments wear protection, a coat with clear Polyx®-Oil Original must be carried out afterwards.

Get stairs and furniture into perfect shape – and with added safety.

For stairs, safety is the number one priority. Even with heavy traffic, they must not become slippery or susceptible to damage. For furniture, the priority is primarily protection of the wood surface, which should keep its attractive appearance for a long time.

Our oil-based coating systems protect wood in every application optimally and produce a long-last and resistant surface, which gives your customers a feeling of security. Osmo also offers almost limitless possibilities to give stairs or furniture a coloured design – from transparent to opaque or rustic to natural and effective. A selection, with which you can easily convince your customers.

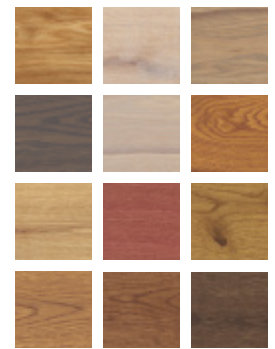

Colour variety and surface protection

Does your customer want one specific colour? With our coatings, you can fulfil their wishes precisely. The colour variety from Osmo does not know any limits: when the available colours of a product are not enough, the colours within one product family can easily be mixed with each other. Or you have the colour of choice mixed to order according to RAL colour charts. At the same time, Osmo coatings provide wood surfaces with long-lasting and reliable protection. A double advantage with which you can make a hit with your customers.

8

11 colours

12 colours

Oil Stain

Endless colour variety, optional with reduced drying time

- > Applications with hardener possible (see page 17)
- > Top coat with all clear Polyx®-Oils and Spray-Waxes
- > Recoatable after approx. 12 hours
- > 1 litre covers approx. 24-48 m² with one coat

2K Wood Oil

With one coat a finished surface

- > Especially suitable for resinous and oily wood species and commercial interiors
- > Fast drying
- > 1 litre covers approx. 40-50 m² with one coat

Further colour mixtures can be found here.

Pore Filler Aqua

Base and mid coat for absorbent substrates, such as MDF boards, with high filling power and good sanding properties

- > High filling power
- > Fast drying
- > Recoatable after approx. 2 hours
- > Ideal as base coat for opaque Osmo Spray-Waxes

Spray-Wax

Creates an especially durable, low-maintenance surface

- > Unsusceptible to scratches and wear-resistant
- > Fast drying
- > 1 litre covers approx. 24 m² with one coat

Two ways, one aim. Colouring Osmo Spray-Wax.

Do you want to colour Osmo Spray-Wax?
No problem, Osmo Oil Stain makes it possible.
You have the choice between two variations:

1. Apply Oil Stain to the surface with a brush and buff into the surface with a pad. After drying, simply coat with Spray-Wax.
2. Add up to 30 % Oil Stain to Spray-Wax and apply to the surface. The finishing coat is carried out with a clear Spray-Wax.

Raw Look. Natural beauty.

The trend is towards natural-looking wood surfaces. With Osmo Polyx®-Oil Effect Natural, wood surfaces retain their natural wood colour. White pigments prevent the so-called "permanent

wet effect" or "ambering effect" on wood. The surfaces look like they were left untreated and are still reliably protected!

Attractive effects – also for your business.

Does your customer want something really special and unique for their interior design? With Osmo coatings, you can achieve stylish and individually adjusted colour effects on the surfaces of furniture and stairs. Show your customers the variety of possibilities: from natural to rustic and from classic to modern. What suits the house and interior style best? How can you bring the best out of the wood? Offer your customers personal consultation and show them what all is possible. And the effect for you: more satisfied and thrilled customers.

Implement current design trends easily and effectively.

The raw wood look is completely on trend and gives furniture as well as stairs a natural charm. With our products, you can easily create this appearance on wood and show the natural work material to its best advantage. The natural beauty of wood is then emphasised, and every piece of wood becomes a unique piece – characterised by its individual grain pattern and texture.

2 colours

Polyx®-Oil Original Natural

On-trend raw look for light-coloured wood

- > No „permanent wet look“
- > Finished surface in 2 days
- > 1 litre covers approx. 30 m² with one coat

*Not available in all countries

Retain the natural wood colour

Polyx®-Oil Original Natural counteracts the natural ambering effect from oiling wood and the surface looks if it is nearly untreated. Plus, the wood is reliably protected against stains resulting from water, wine, beer, cola, coffee, tea, fruit juice and milk.

One coat, reliable protection

With only one coat, you preserve the unique properties of wood surfaces for a long time. Through the fast drying time as well as the healthy and low-maintenance surface,

this one-coat solvent-free 2-component oil is ideally suited to commercial properties. This is how we ensure maximum product quality and reliable results.

Professional-grade quality for professional-grade results

Whether a contract runs smoothly for you not only depends on the successful implementation of an optical design for furniture or stairs, but also time and expenses must pay off for you. Osmo makes your work easier with high-value products developed for professional use. This allows you to achieve more in less time, for example finishing a completely accessible surface within one day with our coating systems. This makes your customers happy and generates new orders.

Optimal products for optimal work processes.

Complete many customer orders in a short time period: this is the goal of efficient work management – but the quality must not be neglected. Our products allow you to combine both. Osmo Polyx®-Oil Express and Polyx®-Oil Rapid support you with very fast drying times, so that you can finish surfaces in only one day – with the Osmo Hardener, the drying time is even more accelerated. The result is an uncompromisingly high-quality hard-wearing surface.

Polyx®-Oil Express

Extremely fast drying

- > Applications with hardener possible
- > Very fast drying
- > Recoatable after approx. 2-3 hours
- > Unsusceptible to scratches and wear-resistant

Polyx®-Oil Rapid

Finished surface in one day

- > Fast drying in approx. 4-5 hours
- > Finished surface in one day
- > Spot-repairable
- > Unsusceptible to scratches and wear-resistant
- > 1 litre covers approx. 30 m² with one coat

Hardener for Polyx®-Oil Express

Accelerated drying and priming for resinous and oily wood species

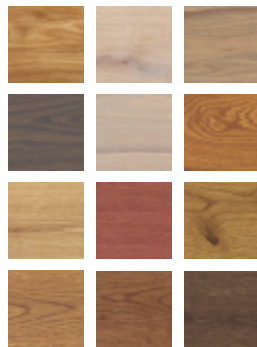

- > Ideal for commercial interiors
- > Additive for Polyx®-Oil Express
- > Drying approx. 1-2 hours

Hardener for Oil Stain

For faster drying

- > Ready to use
- > Ideal for commercial interiors
- > Additive for Oil Stain (See page 9)
- > Drying approx. 4-5 hours

12 colours

2K Wood Oil

With one coat a finished surface

- > Especially suitable for high-wear wood surfaces
- > Fast drying
- > 1 litre covers approx. 40-50 m² with one coat

Further colour mixtures can be found here.

A finished surface with only 1 coat!

2K Wood Oil has two components, which are mixed together directly before the application – the product is then ready for immediate use.

All 2K Wood Oil colours can be mixed with each other – this offers you almost limitless design freedom for the wishes of your customers, and on the other hand, it saves valuable storage space!

Healthy living and durability

Kitchen worktops and work surfaces need effective yet safe protection. TopOil produces highly aesthetic results and is made specifically

for interior furniture surfaces that have direct contact to food. That is peace of mind – for you and your customers.

Tastefully convincing wood surfaces.

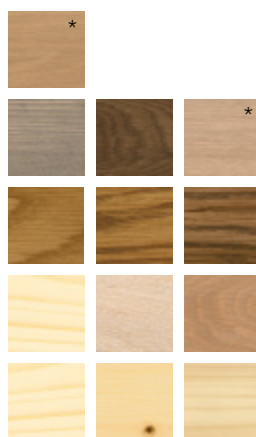

Wood is gaining even more popularity in living spaces. This natural work material radiates a pleasant warmth and contributes to a healthy indoor climate. Using wood in hygienically sensitive areas, like the kitchen and bathroom, does however present high demands on the surface protection. For these situations, Osmo offers safe coatings free of biocides and hazardous substances, which seal worktops reliably and protect them against moisture and dirt. The food-safe surface is not only unsusceptible to water; plus, liquids like wine and cola will not leave stains and can be simply wiped away. Osmo makes it easy for you to convince your customers to include wood in bathrooms and kitchen designs.

More performance for more possibilities

Special indoor climate conditions require particularly strong wood protection. Our coatings based on natural raw materials reliably meet the high requirements of wet rooms and kitchens. They penetrate wood deeply creating a food-safe hard-wearing surface, and at the same time they bring out the unique and attractive appearance of wood. A combination that greatly expands your creative freedom in interior design: With Osmo, you offer your customers limitless variety.

- > Food-safe
- > Especially hard-wearing oil-wax combination
- > Recoatable after approx. 8-10 hours
- > 1 litre covers approx. 30 m² with one coat

Optimal care - for wood and for your customer relations.

Is the interior completed as your customers have ordered and specified? And are your customers are thrilled? Then make sure that this good impression lasts for a long time: Recommend Osmo care products to your customers and provide practical tips on how to easily maintain the attractive appearance of their wooden stairs and furniture. This way your customers also at the same time keep your good work in mind.

22

Osmo care products have been specifically developed for oiled and waxed wood surfaces, so that the surface protection can be maintained for a long time.

A lasting good impression - with Osmo.

A great advantage of Osmo Polyx®-Oils over conventional oil-based coatings is their simple care and maintenance. This is because the wax surface does not allow water and dirt to penetrate the wood surface. How often the surfaces of stairs, furniture and floors should be cleaned and maintained depends on the demands placed on them.

- > Loose dirt should be removed from flooring and stairs.
- > In normal cases, flooring and stairs should be cleaned with a damp mop once a week – or as needed.
- > Worktops and dining tables made of wood should be cleaned with a damp cloth after every use.
