

BELOW GROUND TANKING MEMBRANES

LEVELS OF TANKING

BITUBOND

TANKING MEMBRANE

bituBOND Self Adhesive 1.5mm

used in wet conditions, ideal for damp-proofing foundations & walls
low hydrostatic applications such as shallow excavations or away from the water table
light commercial structures
low risk

BITUFLAME Single Layer

TANKING MEMBRANE

bituFLAME 3mm Single Layer Torch On

used for low hydrostatic applications
dampness/wet conditions/seasonal residential/light commercial structures
low risk

BITUFLAME Double Layer

TANKING MEMBRANE

bituFLAME 3mm Double Layer Torch On

used for medium-high hydrostatic applications
large commercial structures/deep excavations
medium risk

RAWMAT

BENTONITE TANKING MEMBRANE

rawMAT Pre-Hydrated Bentonite

used high hydrostatic applications in the most demanding situations
highly resistant to the effects of water contaminants
high risk

THE BEGINNING OF BRITOMART TUNNEL
